The Vision

‘Nottingham has a world class public transport system which is essential to the local economy, I now want the City to have a world class cycle network, which we can all be proud of and want to use’

Cllr Jon Collins – Leader of the Council

Nottingham City Cycling Design Guide

Introduction

The City Council are working on a Nottingham Specific Design Guide for cycling infrastructure. The guide will take the form of a handbook that illustrates technical guidance relating to cycling. Its primary function will be to set out key design principles for the Council’s staff and agents in developing innovative and user friendly facilities for cyclists.

Overarching Principles

- **Safety**
- **Comfort**
- **Coherence**
- **Attractiveness**
- **Adaptability**
- **Directness**

Existing Guides used to inform the Nottingham Document.

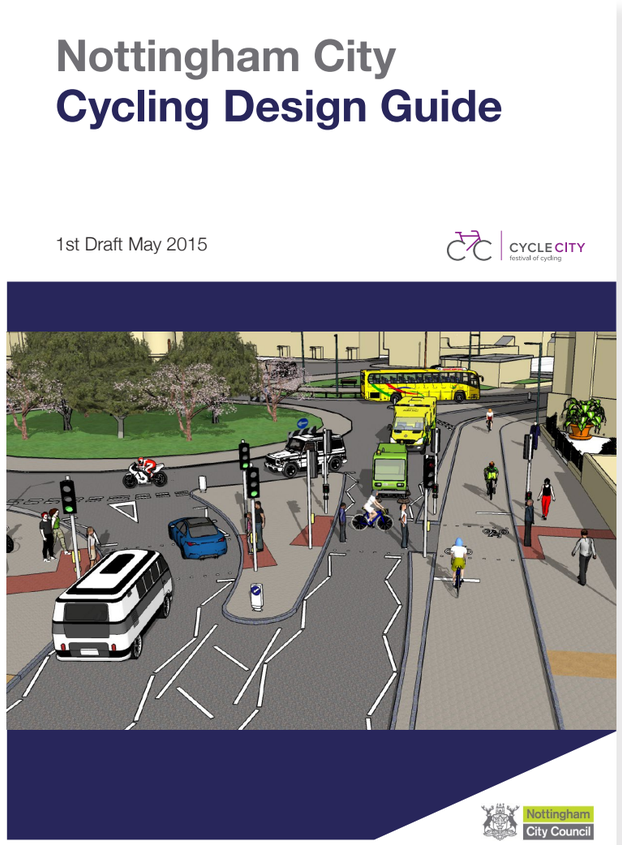

Nottingham City Cycling Design Guide

Workshops

In April this year the City Council hosted three workshops to provide input from internal transport teams and external professional organisations (Nottinghamshire County Council, Highways England and, Sustrans). The discussions that took place during the workshops were used to inform design principles which in turn informed the draft Design Guide.

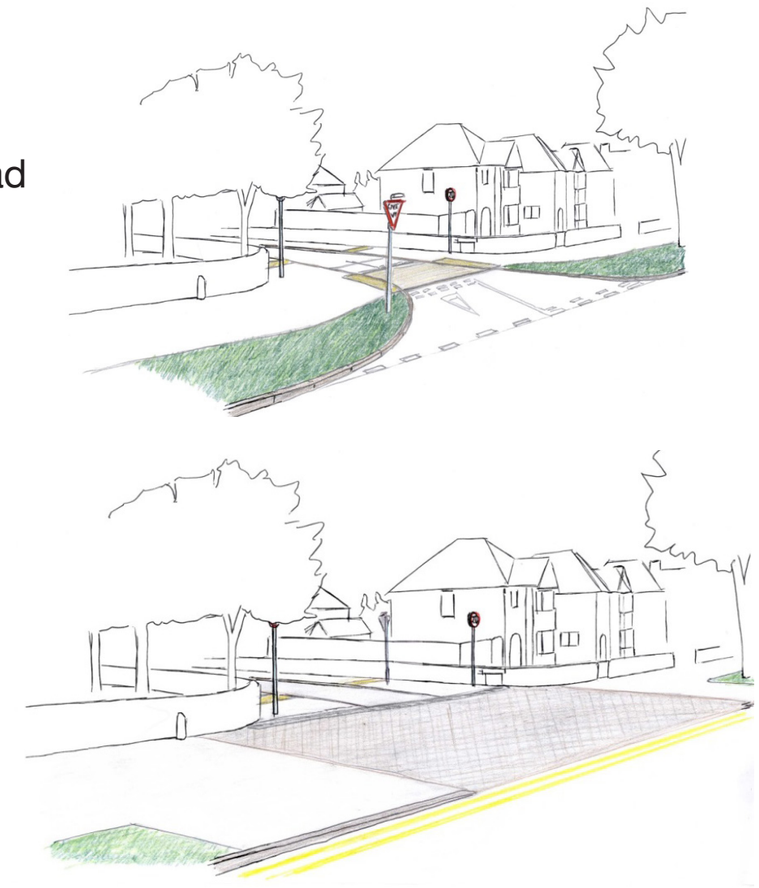

Design Guide Examples

Options for Outer Ring Road side road entry treatments giving cyclists priority

Example of a ‘floating bus stop’

We need to balance the needs of all modes of transport but at the same time ensure that better quality cycle infrastructure for cyclists is provided. We would welcome your thoughts.
