

Improved side-road crossings for pedestrians and cyclists on Middleton Boulevard

The City Council are continuing with works to make changes to side roads, making crossings for cyclists and pedestrians safer and more convenient on Middleton Boulevard.

Different types of junction layouts will be built where the existing off-road cycle route crosses the road. One of these will set 'Give Way' markings back from the junction, so that vehicles entering and leaving give way to cyclists and pedestrians crossing the road. On quieter roads and cul-de sacs, the junction will be changed to a layout which is similar to that of a private drive, where the motorist gives way to pedestrians and cyclists on the pavement.

From **Monday 15th August 2016**, we are building the Give Way type of side-road layout on Oundle Drive at its junction with Middleton Boulevard to ensure vehicle access can be maintained at all times during construction.

To help complete these improvements quickly and safely, lane restrictions will be in place during the week between 9.30am and 3.30pm on the slip road to provide a temporary path for pedestrians and cyclists around the site. Access for motorists to and from Oundle Drive will be managed manually on a give-and-take arrangement. The works are expected to be completed by Sunday 28th August 2016.

We apologise for any inconvenience that these works may cause you and thank you for your support and patience; we are endeavouring to complete this programme of improvements in the shortest time possible and would like to assure you that we will do all that we can to keep disruption to a minimum.
