Creative Quarter

Pilcher Gate/St Mary's Gate Pedestrian Environment Improvements

As part of the Creative Quarter transport improvements Nottingham City Council will be making improvements to Pilcher Gate/St Mary's Gate. These works are for approximately 3 months, starting on 2nd April.

What is being improved as part of these works?

Pedestrian and cycle route improvements including the upgrade of footway and carriageway materials and raising the carriageway towards footway levels to tie into the existing enhanced street design on St Mary's Gate towards Warser Gate. This will not affect car park access and exit arrangements.

Nottingham City Council

Creative Quarter

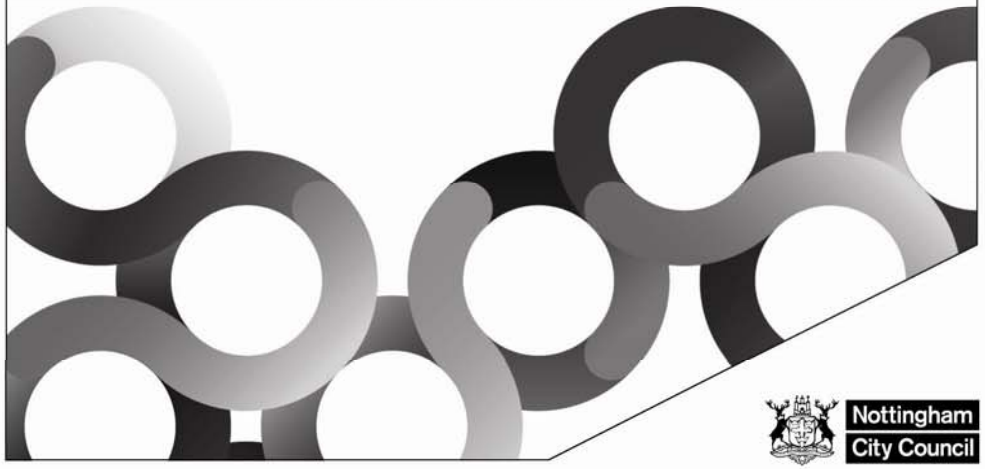

How will the improvements be carried out?

In order to safely carry out the works, St Mary's Gate will be closed to through traffic between its junction with St Mary's Place and Pilcher Gate. Pilcher Gate will be closed to through traffic between St Mary's Gate and Halifax Place. Loading and pedestrian access to frontages will be maintained throughout the works.

Loading access beyond the works on St Mary's Gate between Picher Gate and High Pavement will be via a short sign-posted diversion along Warser Gate, Stoney Street and Broadway. For access to St Mary's Place, the one-way system on St Mary's Gate will be temporarily removed to enable egress via the above route.

We apologise for any inconvenience these works may cause and would like to reassure you that we will do all we can to keep any disruption to a minimum.

If you would like to know more about the construction works taking place please call Senior Engineer, Ben Biddulph on: (0115) 8765409.
