4. Trinity Square - A refurbished square, linked to the recent design competition, incorporating new paving, seating and lighting. The design will provide a flexible space for future uses. Work will start in spring/summer 2013.

5. Stoney Street/Warser Gate junction - Upgrading of materials and improved pedestrian priority. Work will start in summer 2013.

6. Heathcoat Street - Refurbishment and upgrading of footway materials. Other improvements to be considered. Work will start in autumn 2013.

7. Bath Street/Southwell Road/Carlton Road junction improvements New and simpler pedestrian crossing facilities linking St Ann's and Sneinton with the recently refurbished Sneinton Square and wider Creative Quarter area.

8. Manvers Street/Pennyfoot Street junction improvements - New and simpler pedestrian crossing facilities linking Sneinton with the wider Creative Quarter area.

9. Connecting Eastside Phase 2 - Following the recently implemented Phase 1, Lower Parliament Street will be made two-way between Southwell Road and London Road. This will allow greater priority for buses, cyclists and pedestrians on Bellar Gate, Belward Street and Cranbrook Street. Work will take place in 2014/15 and 2015/16.

Creative Quarter

Creative Quarter Transport Improvements

building a better Nottingham

March 2013

Nottingham City Council

What is the Creative Quarter?

The Creative Quarter is Nottingham's flagship project for economic growth. As part of Nottingham's economic Growth Plan for the city, the vision for the Creative Quarter is to encourage and support Nottingham's indigenous businesses whilst bringing new high-tech, high growth industries to Nottingham providing good jobs, wealth and becoming part of the fabric of Nottingham's economy.

The Creative Quarter encompasses the Lace Market and Hockley as well as Sneinton Market and the Island Site. Many of Nottingham's emerging growth sector businesses are already located here and it is where new creative businesses are being encouraged to locate to help entrepreneurship to flourish within the heart of Nottingham's city centre.

Creative Quarter transport improvements

Improvements are being made to transport access and infrastructure to help support economic growth. You can let us have your views on these plans to improve access to the whole Creative Quarter area and introduce a more logical route for through traffic. An extended bus loop will also allow services that currently terminate in the north of the city to be re-routed via the Creative Quarter.

1. Broad Street - Work will include pedestrian environment improvements, linked to the recent successful outdoor dining scheme. This will incorporate new paving, kerbing and raising the carriageway level with the footways; the design will allow outdoor dining areas during the summer months with Pay and Display parking reinstated during the winter. As part of these works Old Lenton Street will also be improved with new paving, kerbing and resurfacing. Work will start in spring 2013.

2. George Street - The pedestrian environment along the whole length of George Street will be improved with new paving and kerbing. Existing bus stops and Pay and Display bays will not be affected. The City Council is looking into increasing the number of Pay and Display bays on George Street in the future. Work will start in spring 2013.

3. Pilcher Gate/St Mary's Gate - Pedestrian route improvements, including upgraded materials and raising the carriageway to footway levels, tying into the existing enhanced street design here. This will not affect car park access and exit arrangements. Work will start in spring 2013.
