Purpose of the JSNA

Some of the key reasons as to why we produce JSNA's are to:

- Inform local commissioning
- Assess needs
- Assess assets
- Share community insight
- Improve health outcomes
- Enhance awareness and knowledge
- Facilitate collaborative working
- Review evidence of what is effective

Collaboration model for JSNA development (Public Health England, 2019)

Development of JSNAs involves a collaboration of both national and local inputs.

Examples of local inputs which are bespoke to the area are:

- Stakeholder voices
- Local expertise
- Knowledge of services
- Local data
- Local interventions
- Identified priorities

Examples of national inputs are:

- Overview metrics
- Links to detailed metrics
- Policy guidance
- Robust evidence base
- National expert opinion

Nottinghamshire JSNA

Nottinghamshires' JSNA consists of 44 chapters (as of April 2020). Each chapter falls under one of these 4 areas:

- Cross cutting themes
- Children and young people
- Adults and vulnerable adults
- Older people

Each Nottinghamshire chapter is split into 3 sections which are:

1. What do we know?
2. What does this tell us?
3. What should we do next?
